???????? ???????? DECT VoIP Alcatel IP2215

The core of Alcatel IP2215 solution is composed of a cordless DECT handset & an out-of-sight base, which can be placed anywhere in the premises. As the solution is scalable & flexible, it accepts Alcatel IP30 deskphones, completely adapted to equip the offices of assistants & secretaries. For employees requiring more mobility, it's also possible to associate additional cordless DECT handsets (Alcatel IP15). Up to 6 terminals can be paired to the base. Furthermore, The range can be extended by adding repeaters (Alcatel IP DECT Repeater). Up to 5 repeaters can be set in star configuration & up to 2 daisy-chained. Alcatel IP2215 enables you to secure your investments by purchasing a solution which is already IPv6 compatible & will perfectly fit in your company telephony set up thanks to its broad interoperability with many VoIP existing systems.
