Description

Grandstream GWN7610 Enterprise 802.11ac Gigabit WiFi Access Point PoE

Grandstream GWN7610 is a high-performance 802.11ac wireless access point for small to medium sized businesses, multiple floor offices, commercial locations and branch offices. Offers dual-band 3x3:3 MIMO technology and a sophisticated antenna design delivering maximum network throughput and expanded Wi-Fi covering range. To ensure easy installation & management, GWN7610 uses a "controller-less" distributed network management design where the controller is embedded within the product's web user interface. This allows each access point to manage a network of up to 50 GWN7610s independently without needing a separate controller hardware/software and without a single point-of-failure. This wireless access point can be paired with any third party router as well as Grandstream's GWN series routers. Supporting advanced QoS, low-latency real-time applications, 250+ client devices per AP as well as dual Gigabit network ports with PoE/PoE+, Grandstream GWN7610 turns to be an ideal wireless access point for large and small wireless network deployments.

Key Features & Benefits:

- IEEE 802.11 a/b/g/n/ac WiFi standards
- 1.75Gbps wireless throughput
- 2 Gigabit wireline ports
- Dual-band 3x3:3 MIMO technology
- Self power adaptation upon auto detection of PoE or PoE+

- Supports more than 250+ WiFi client devices
- Advanced QoS to ensure realtime performance of low-latency applications
- Up to 175 meters covering range
- Embedded controller allowing the GWN7610 to auto-discover, auto-provision & manage up to 50 GWN7610s in a network
- Anti-hacking secure boot & critical data/control lockdown via digital signatures
- Unique security certificate/random default password per device
- USB 2.0 port, Reset Pinhole & Kensington lock
- Indoor wall mount / ceiling mount kits included
- 3 tri-color LED indicators for device tracking & status
- 2 Year Warranty

Package Content:

- GWN7610 802.11ac Wireless AP
- Mounting Kits
- Quick Start Guide
