AI Invoices – Intelligent Automation - Invoice Management

Capture • Review • Approve

Automated processing of incoming invoices with AI and Microsoft 365. Less data entry, structured information and a controlled workflow through to payment.

Centralized invoice tracking and pending AI reviews

HOW IT WORKS IN 5 STEPS

1 RECEIVE

Shared mailbox
or upload scanned files

2 AI EXTRACTION

Supplier, amounts,
dates and category

3 REGISTER

Structured list
for tracking

4 APPROVE

Notifications based on
business rules

5 PROCESS

Ready for accounting
processing and payment

WHAT IT DELIVERS FOR YOUR BUSINESS

Automatic extraction and categorization.
Structured data in SharePoint or another database.
Notifications via Teams and email.

Less manual work and fewer errors.
Greater control and traceability.
Faster decisions and fewer delays.

SEE THE FEATURES IN ACTION

AI REVIEW AND HUMAN VALIDATION

Check the confidence score, compare the fields with the invoice and correct them before validation. Low scores require closer human review.

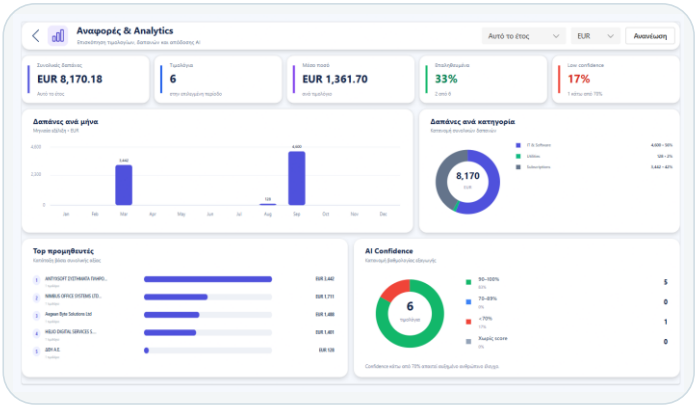

INVOICE REGISTER AND SEARCH

Search by supplier, invoice number or tax ID.
Filter by status and category.

REPORTING AND AI CONFIDENCE

Spending by month, category and supplier.
Monitor data extraction confidence.

APPROVALS AND TECHNOLOGY

Multi-level approvals and routing to the appropriate departments before payment.
Microsoft 365 • Power Apps • Power Automate • SharePoint • Artificial Intelligence
Secure, scalable architecture in the cloud with support for ERPintegration.
